

Brownfields 2016 Cleanup Grant Fact Sheet

Wayne County Economic Development Authority Inc., WV

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$200,000 for hazardous substances

EPA has selected the Wayne County Economic Development Authority Inc. for a brownfields cleanup grant. Hazardous substances grant funds will be used to clean up the former Kenova Grade School site at 1400 Poplar Street in Kenova. The one-acre property was used as a school from 1910 to 2012, and has been closed since then. It is contaminated with inorganic contaminants and lighting ballasts. Grant funds also will be used to support community involvement activities, and conduct redevelopment planning.
